## Professional Summary

Full-Stack Web Developer with hands-on experience in MERN stack, Django, React, and Node.js. Skilled in building scalable, responsive web applications with RESTful APIs, JWT authentication, and cloud deployment. Proficient in algorithmic problem solving and competitive programming, with 321.11 points and top 4% ranking on BeeCrowd.

## Skills

**Frontend:** React.js, Next.js (SSR, SSG), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS  
**Backend:** Node.js, Express.js, RESTful APIs, MongoDB, MySQL, JWT Authentication  
**DevOps / Tools:** Git & GitHub, Docker (basic), Firebase, Vercel, Netlify, CI/CD  
**Others:** Performance Optimization, Cloud Deployment, Socket.IO (basic)

## Experience

**Frontend Developer** Zensoft Lab · Sep 2025 – Present

- Developed scalable full-stack features using Node.js, Express.js, and React.js.
- Collaborated with backend teams to integrate RESTful APIs and manage databases (MongoDB/MySQL).
- Built authentication systems using JWT and optimized app performance.
- Deployed full-stack apps on cloud platforms ensuring high availability.

## Projects

**Medical Camp Management System (MCMS)** MERN, Node.js, React, MongoDB, JWT, Stripe

- Engineered a full-stack medical management platform using Node.js, Express.js, and React.js.
- Designed RESTful APIs, implemented JWT authentication, and managed cloud-hosted MongoDB.
- Integrated Stripe for secure online payments and Firebase for additional authentication.
- Built responsive admin dashboards for managing users, bookings, and transactions. **Live:** [MCMS](#)  [Client](#) — [Server](#)

**ProFast – Parcel Delivery Service** MERN, Node.js, React, MongoDB, JWT, Next.js Concepts

- Developed a scalable parcel delivery platform using Node.js, Express.js, React.js, and MongoDB.
- Implemented RESTful APIs and secure JWT-based authentication with role-based access control.
- Built a dynamic parcel tracking system and optimized API response times.
- Deployed frontend and backend on Vercel and Render for cloud scalability. **Live:** [ProFast](#)  [Client](#) — [Server](#)

**WhereIsIt – Lost & Found Platform** MERN, Firebase

- Built a community platform for reporting lost or found items using MERN stack.
- Integrated Firebase authentication, user profiles, and image upload functionality.
- Implemented advanced search and recovery confirmation system for user engagement. **Live:** [WhereIsIt](#)  [Client](#) — [Server](#)

## Training & Courses

**Web Development Bootcamp** — Programming Hero (6 months)  
Hands-on training in full-stack development; completed 45+ projects using React, Node.js, Express, and MongoDB.

**EDGE Program: Enhancing Digital Government and Economy** — BCC, ICT Division  
Intermediate-level training in Python and Django with focus on scalable web applications.

## Achievements

- VC's & Dean's List Scholarship for Academic Excellence (2022–2025)
- Competed in ICPC and IDPC programming contests; strengthened algorithmic skills.
- Ranked in the top 4% on BeeCrowd out of 24,232 global participants with 321.11 points.

## Education

**B.Sc. in Computer Science & Engineering** Expected Graduation: Jan 2026  
Green University of Bangladesh CGPA: 3.75/4.00

## Languages

Bangla (Native), English (Fluent), Hindi/Urdu (Conversational)
